Clifton Rubber Hold-Fast Gutter Mat, designed in partnership with Hemingfords' Bowls Club (Cambridgeshire)

- Meets all new criteria and regulations set by the bowls governing bodies
- Protects woods and jacks which drop into the gutter
- Is flexible, durable and maintenance free
- Is cost effective

**Peter Raven**  
Treasurer,  
Hemingfords' Bowls Club  
(Cambridgeshire)

*"Working with Clifton Rubber has been a revelation. They immediately understood our problem and proceeded to develop a superb quality GUTTER MAT for the perimeter of our bowls green which satisfied all conditions. We had difficulty in finding this quality elsewhere.*

*Since its introduction, our Clifton Rubber Gutter Mats have received nothing but praise. They look fantastic but mainly they do the job they were designed for. We now have a bowls green which meets the criteria required to enable our Club to stage County and National matches. When a 'jack' or a wood reaches the gutter, it stays where it landed, such is the design and reliable performance quality of the matting. Beforehand, woods might travel several feet, following the contour of the gutter.*

*We have no reservations at all in recommending this excellent new product to any other Club!"*
